

# Task description

Make your own custom login page with username and password. Your goal is to let the user fill in the data and after he taps the button show a full screen cover which will have a text to greet the user including his username! (check out the print screens down below).

**Stacks used:** ZStack, VStack

**View modifiers used:**

```
.padding()  
.background()  
.foregroundColor()  
.cornerRadius()  
.font(.system(size: , weight: ))  
.edgesIgnoringSafeArea()  
.fullScreenCover
```

**Shapes used:**

none

**SF symbols used:**

“play.fill”

**Tip:**

Make a separate struct for the “greeting page” and use @Binding to get the username.

Solution is available in file **Solution.swift**

**Good luck!**
