

# Task description

Practice Sheets, FullScreenCovers and @Binding property wrapper. Picture down below is only a static print screen. To see the the full functionality, check out the **demo.mov** file.

**Stacks used:** ZStack, VStack, HStack

**View modifiers used:**

```
.padding()  
.background()  
.foregroundColor()  
.cornerRadius()  
.font(.system(size: ,  
weight: ))  
.edgesIgnoringSafeArea()  
.onTapGesture
```

**Shapes used:**

none

**SF symbols used:**

“chevron.left”

**Tip:**

Make two structs for content of the sheet and full screen cover and use @Binding to bind the boolean variable with ContentView.

Solution is available in file

**Solution.swift**

**Good luck!**
